

PRODUCT LINE CARD

RM Reps Co. is authorized to sell and service the below manufacturers.
Contact us directly for any product related inquiries.

Extensive line of medium voltage power distribution equipment including single and 3 phase transformers, underground and overhead switchgear, voltage regulators, switches, fuses, surge arresters, power capacitor equipment, smart sensors, relays, controls, and line installation and protective equipment (LIPE).

Fiberglass utility products including trench covers, ground sleeves, transformer box pads, hillside barriers, switchgear box pads, and secondary splice boxes.

Federal Pacific manufacturers a wide variety of products including dry-type medium voltage transformers, metal-enclosed, pad-mounted, and custom engineered switchgear, and medium voltage substation solutions.

Cast-coil, and VPI dry-type distribution transformers suitable for indoor and outdoor installations ranging from 50kVA to 25MVA, and system voltages up to 44kV. TMC also offers chokes, reactors, network/submersible transformers, special harmonic designs, air forced water cooled designs, and low-voltage transformer solutions.
