

RM REPS Co.

POWER DISTRIBUTION EQUIPMENT

PRODUCT LINE CARD

RM Reps Co. is authorized to sell and service the below manufacturers.
Contact us directly for any product related inquiries.

Extensive line of medium voltage power distribution equipment including single and 3 phase transformers, underground and overhead switchgear, voltage regulators, switches, fuses, surge arresters, power capacitor equipment, smart sensors, relays, controls, and line installation and protective equipment (LIPE).

Turn-key industrial packages, metal-enclosed assemblies, capacitor assemblies, primary switchgear, harmonic filter applications and harmonic/ power factor correction studies, a comprehensive line of reactors including oil filled, pad mount, shunt, harmonic filter, single phase, and three phase.

Fiberglass utility products including trench covers, ground sleeves, transformer box pads, hillside barriers, switchgear box pads, and secondary splice boxes.

Capacitor controls, SCADA Master Station and Remote Terminal Units (RTU), Power Quality Analyzers and Trend Recorders.

Federal Pacific manufacturers a wide variety of products including dry-type medium voltage transformers, metal-enclosed, pad-mounted, and custom engineered switchgear, and medium voltage substation solutions.
